FOR FOUNDERS OF NEW AND GROWING BRANDS

You started a brand. Not a tech company.

Yet getting a store that looks as good as your product still means:

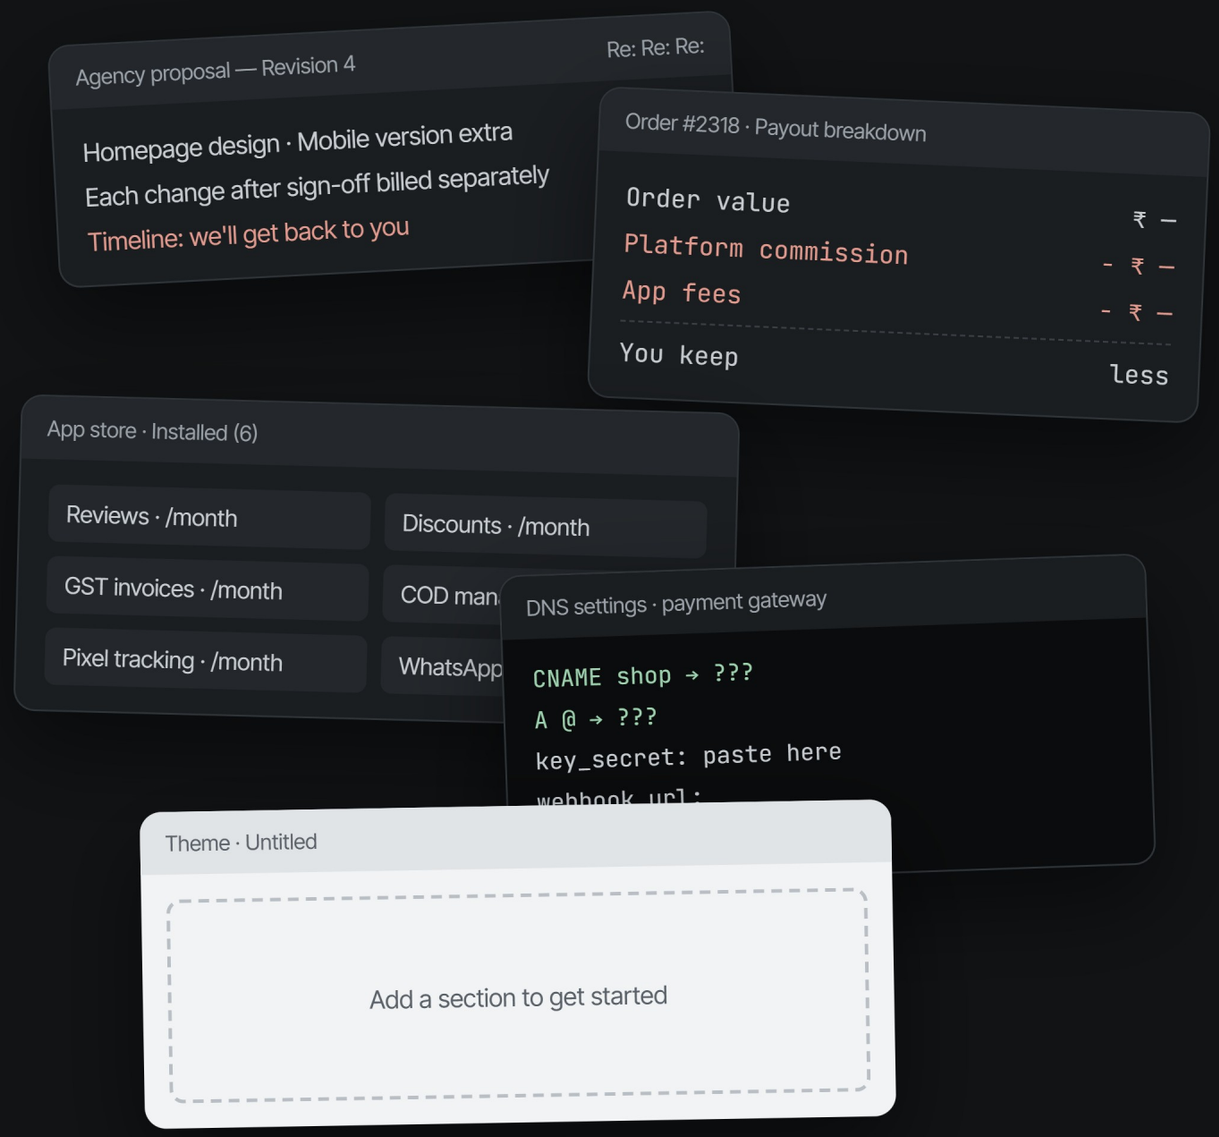

01 **Hiring an agency because it's "too technical"**
Weeks of briefs, revisions, and waiting on someone else for every change.

02 **A commission on every single order**
The more you sell, the more the platform takes.

03 **Paid apps for every basic feature**
Reviews, offers, tracking, invoices — one more subscription each.

04 **Payments, delivery and domains that fight back**
API keys, webhooks, DNS records — in a language you never signed up for.

05 **A blank template and no one to guide you**
Hundreds of settings. Zero answers to "what should I do next?"

FEEL

Recognition, not fear. "Someone finally said it." Cool grey palette, so the warm hero that follows feels like relief.

MOTION

Each pain line lights up as its window drops onto the pile — five lines, five windows, getting messier. On scroll, the pile is swept aside and Ann's first message appears: "Let's skip all that. What does your brand sell?" → Scene 01.

ANSWERED LATER BY

01 agency → Ann (Sc. 02) · 02 commission → no per-order cut · 03 paid apps → built-in offers, GST, COD, tracking (Sc. 05–07) · 04 integrations → guided Razorpay, domain, Shiprocket (Sc. 05, 07) · 05 no guidance → Ann

FOR INDIA'S NEXT ICONIC BRANDS

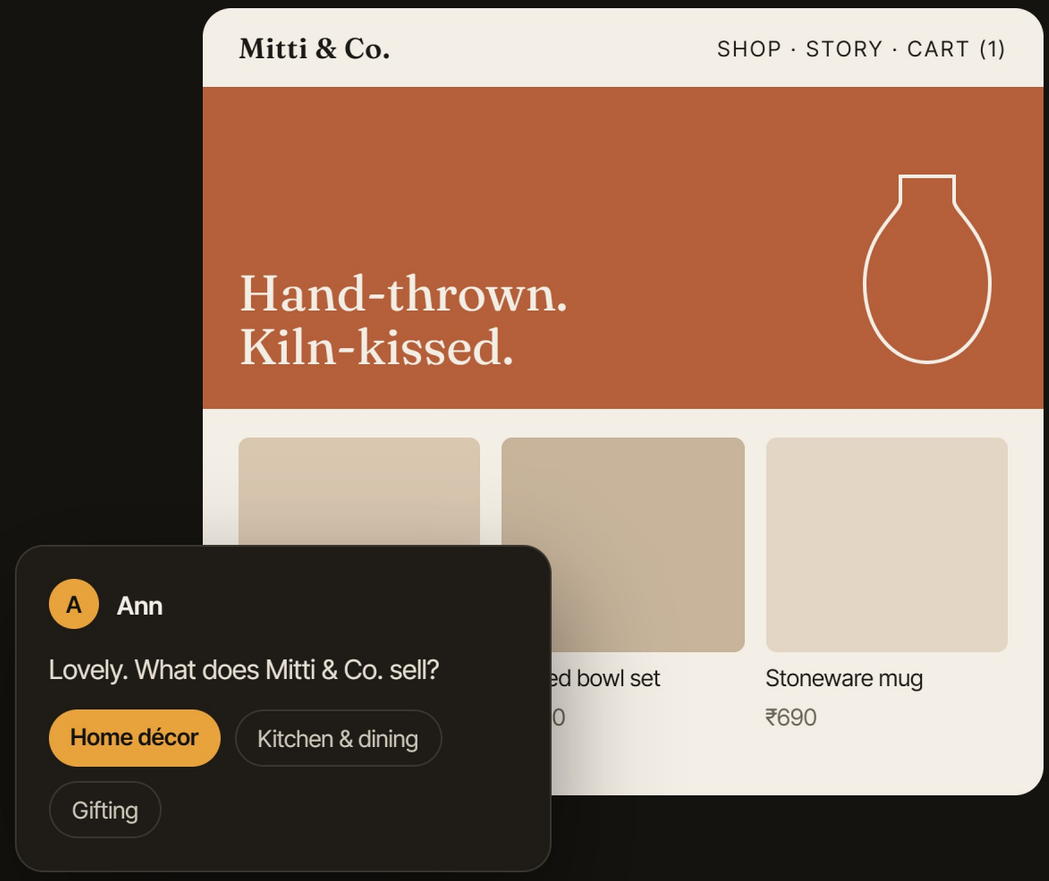

A flagship store, built in a conversation.

Tell Ann about your brand. Watch a high-end store take shape — catalogue, India-ready checkout, GST invoices and all. No code. No agency. No commission on your orders.

Build my store with Ann

See live storefronts

English हिन्दी தமிழ் मराठी తెలుగు

FEEL

"This looks premium — and it's built for someone like me." Aspiration first, reassurance in the subline.

MOTION

Ann's chip gets tapped; the storefront assembles section by section on the right. The chat card slims as the preview grows — the real adaptive workspace, shown not told.

BUILT ON

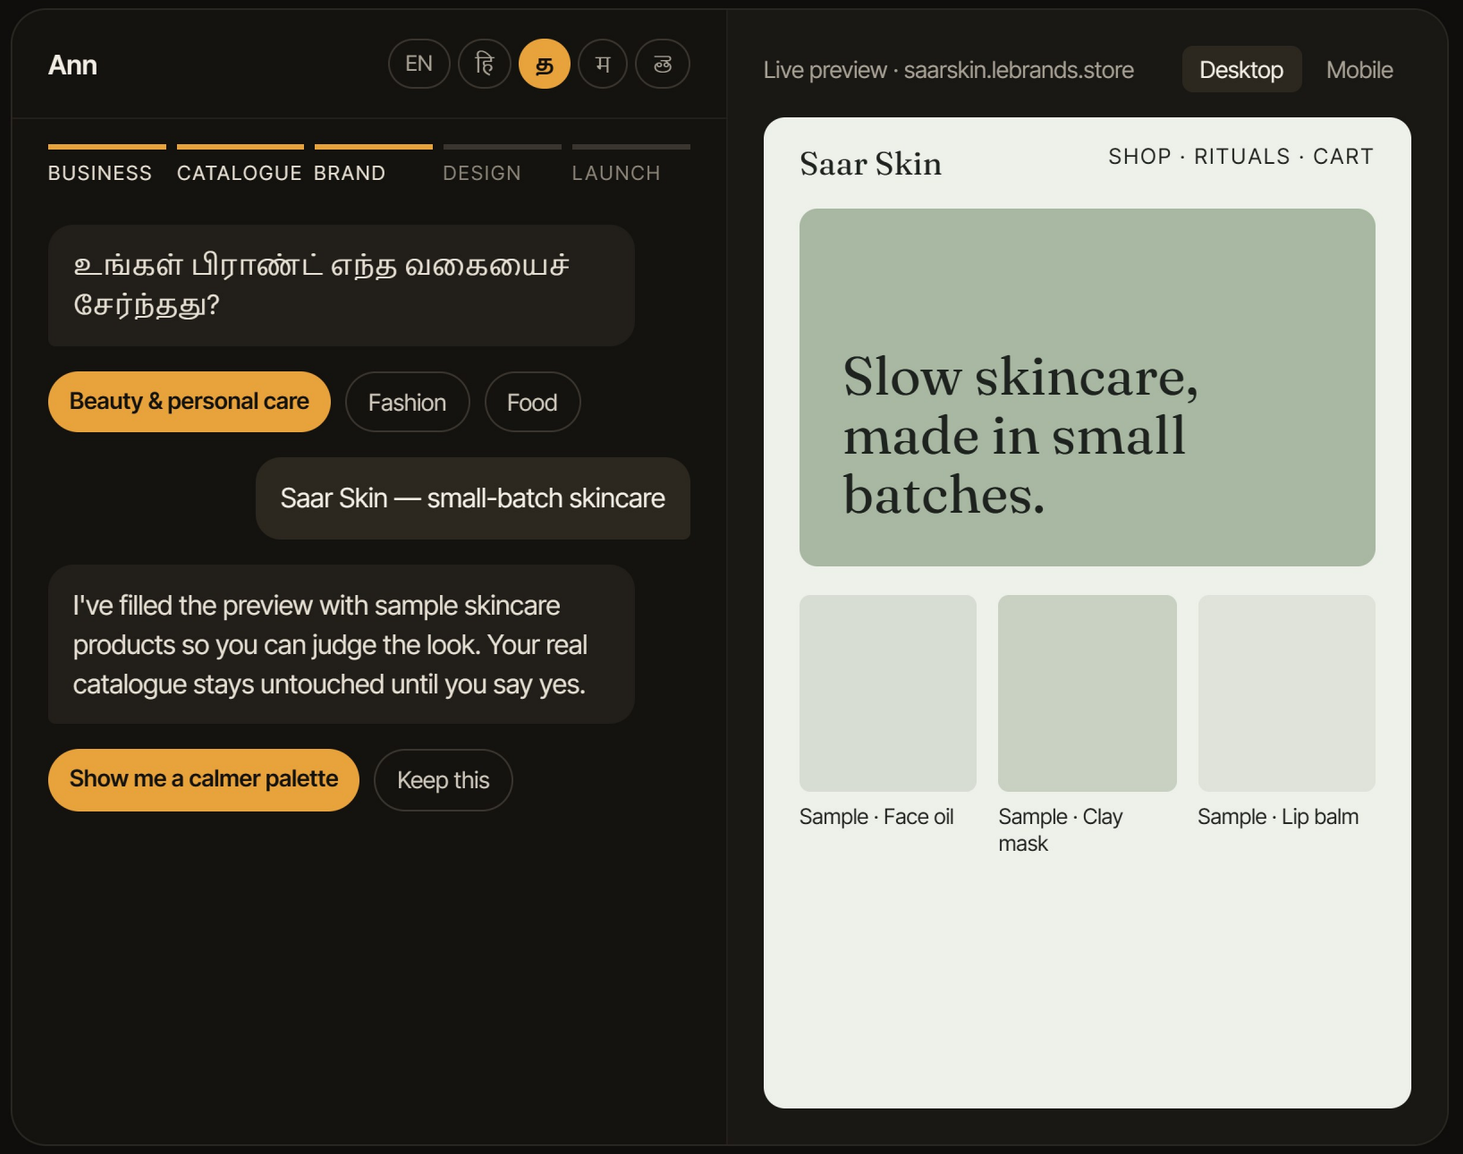

Ann guided creation · Adaptive workspace · 5 regional languages · Category-aware starting content

MEET ANN

No blank canvas. Just a conversation.

Ann walks you from business setup to catalogue, branding, design and launch — one question at a time, with choices right in the chat. If you can answer a WhatsApp message, you can build this store.

- ✓ Speaks English, Hindi, Tamil, Marathi and Telugu
- ✓ Switch language anytime — your product details stay exactly as written
- ✓ Experiment freely — nothing replaces your saved work

FEEL

"I don't need to be technical — someone is guiding me, in my language."

MOTION

Language pill cycles EN → த → हि; Ann's bubble re-renders in each, while "Saar Skin — small-batch skincare" never changes. Progress rail fills as the user scrolls.

BUILT ON

Ann guided creation · Regional-language guidance · Sample content kept separate · Desktop/mobile preview

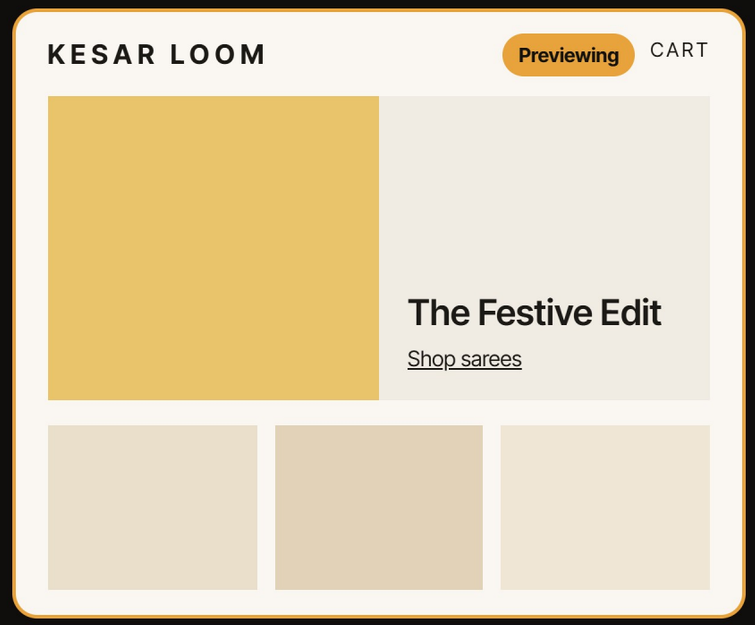

DESIGNS WORTH A FLAGSHIP

Try on a look. Keep only what you love.

Compare styles on the same sample catalogue for your category. Nothing touches your real products, prices or stock until you choose to adopt a design.

Editorial Noir — Serif · deep tones

Gallery Minimal — Airy · type-led

Pop Studio — Bold · playful

Adopt Gallery Minimal

Your real catalogue is used only after you agree.

FEEL

"My brand could look like this?" Desire, plus zero risk of breaking anything.

MOTION

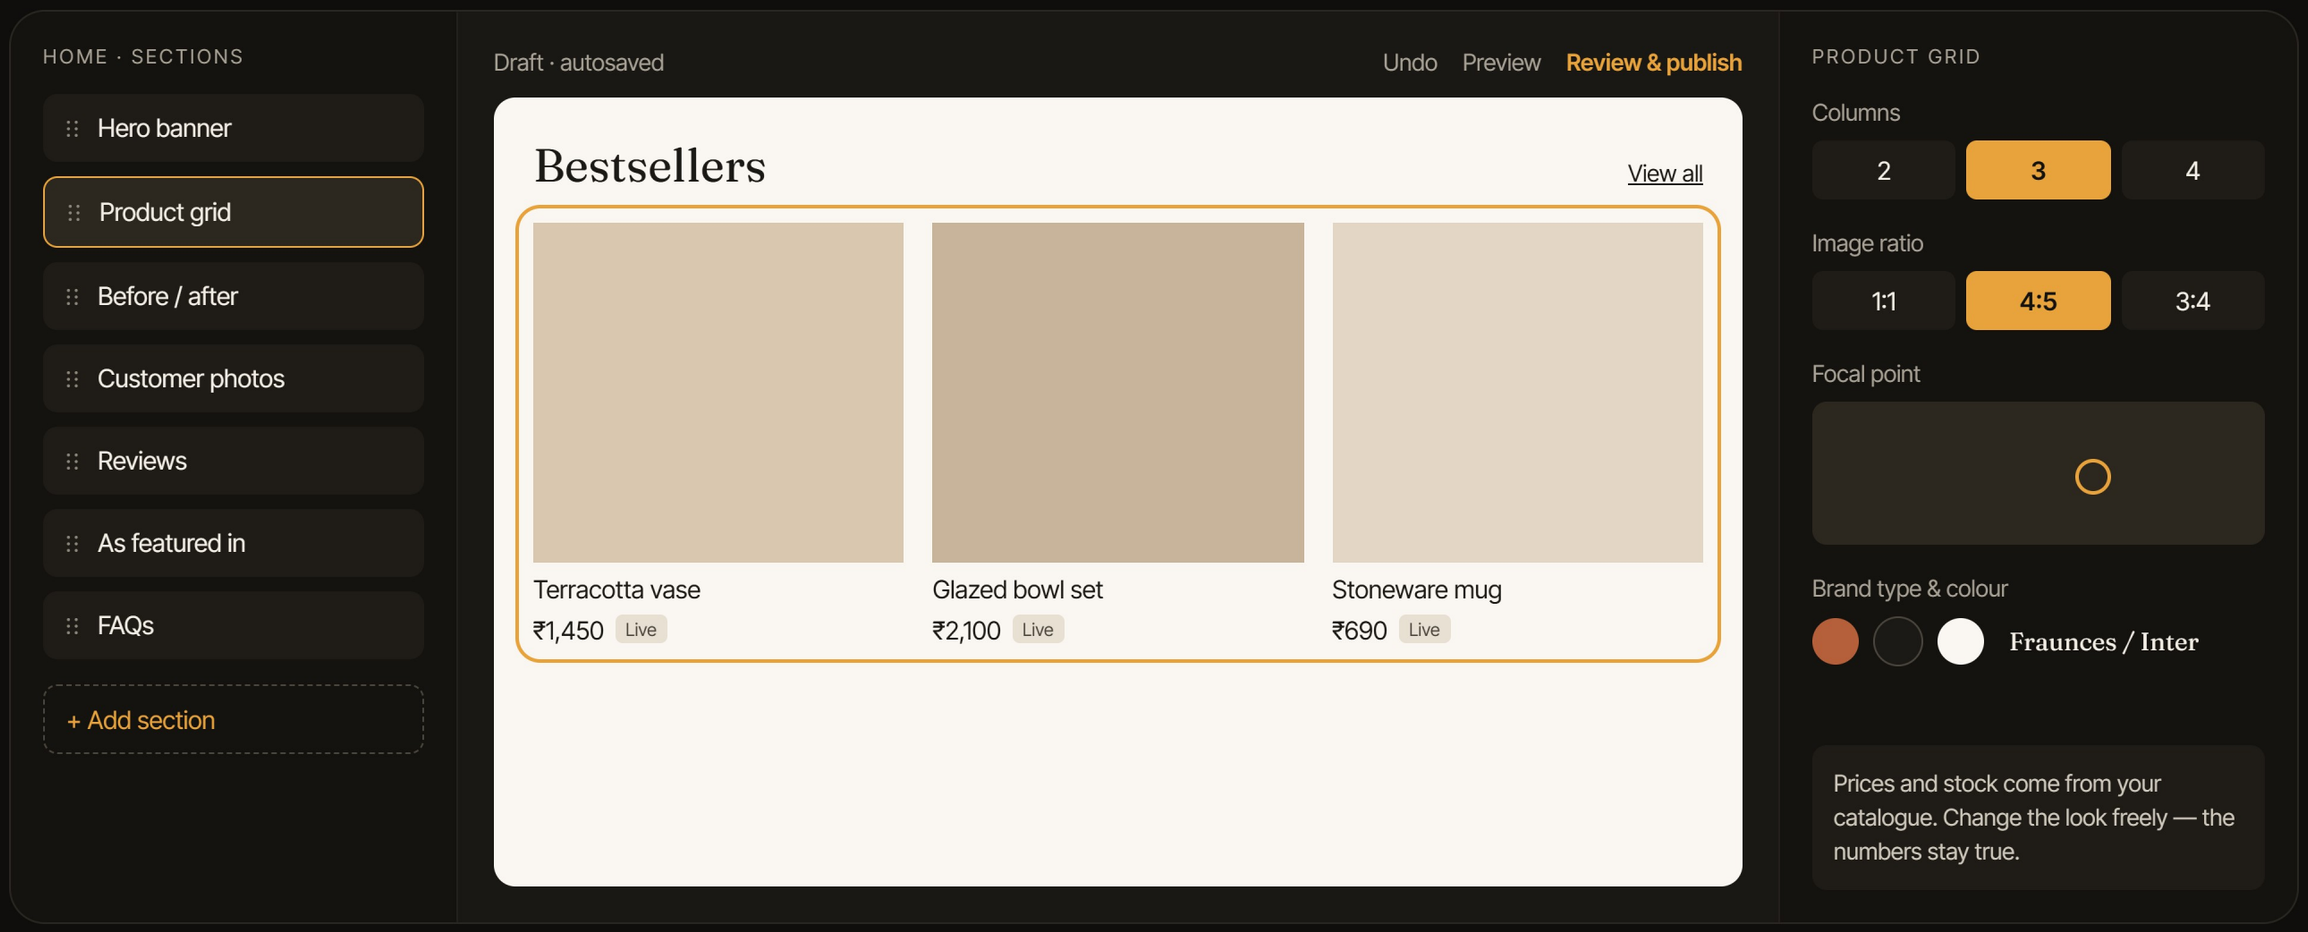

Horizontal scroll-snap through looks; the same three sample products morph between styles while the cart and checkout chrome stays recognisable. Hover lifts the "Previewing" card.

BUILT ON

Category-aware sample catalogue · Explicit adopt step · Consistent shopping across themes · Saved designs stay distinct

Every detail, your call. Every price, protected.

Your Ann design flows straight into the theme editor. Add, reorder and fine-tune commerce sections — while prices and stock stay live from your catalogue, never retyped by hand.

FEEL

"Guided doesn't mean boxed in." Designer-level control for brands that care about craft.

MOTION

"Reviews" is dragged above "Before / after" and the canvas reflows. Columns flip 3 → 4 → 3; the "Live" price tags stay locked in place through every change.

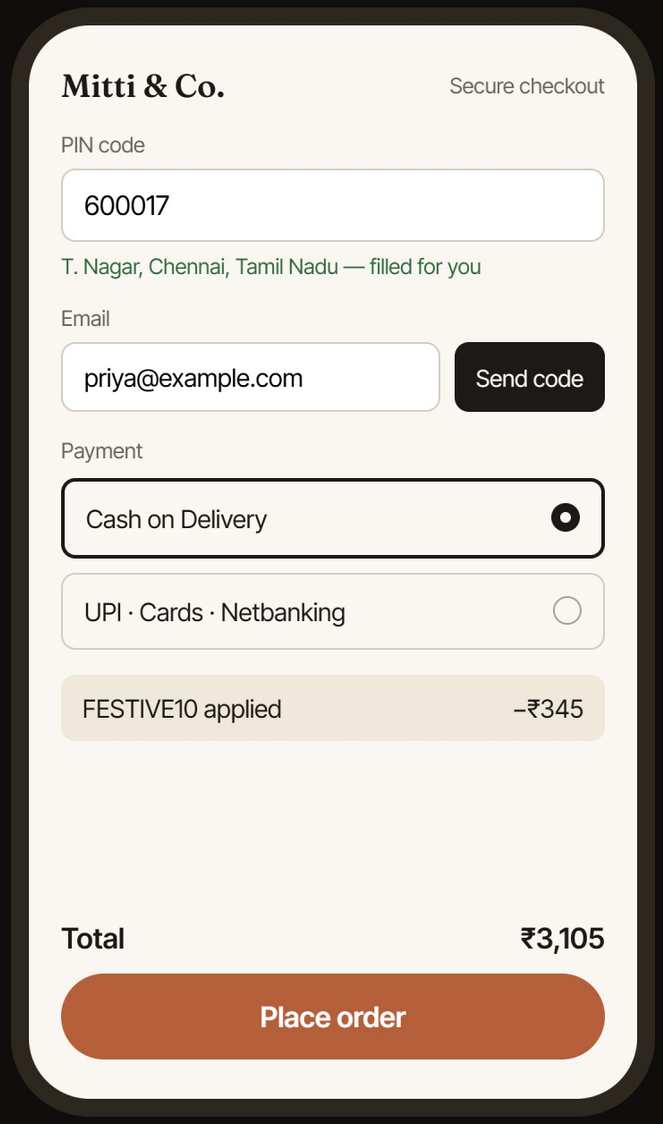

BUILT ON

Connected theme editor · Shared section library · Grid & focal-point controls · Catalogue-backed cells · Draft / undo / review

INDIA-FIRST CHECKOUT

A checkout that knows India.

Cash on Delivery from day one. PIN-code address fill. Your own Razorpay when you're ready. Prices, stock and offers checked on the server — so every order is a real one.

Your Razorpay, your money

Connect your own account by signing in — no API keys pasted into forms. Online payments switch on only when you say so.

GST invoices, done right

GSTIN checks, GST-aware invoices and credit notes, with numbering that never rewrites history.

Offers that add up

Automatic offers and codes by order, product or collection — with minimums, schedules and limits.

FEEL

"This isn't a pretty website — it's a shop my customers will actually buy from."

MOTION

Phone stays pinned while side cards scroll past. "600017" is typed; city and state slide in. The offer line ticks the total down. "Send code" shows a calm wait state, not a spinner storm.

BUILT ON

India-focused checkout · Merchant-owned Razorpay (OAuth) · GST invoices & credit notes · Native offers & codes

Not just a website. A back office, from day one.

Orders, COD returns and RTO, stock by SKU, private product costs and honest reports — in one place your team can share, with the right access for each person.

Order desk

Sample data

ORDER	CUSTOMER	PAY	STATUS
#1042	Priya R. · Chennai	COD	To dispatch
#1041	Arjun M. · Pune	UPI	Shipped
#1039	Fatima S. · Hyderabad	COD	RTO
#1037	Kiran D. · Mumbai	Card	Return · refund

Analytics

FY Apr–Mar

Booked order value — not "cash collected"

Estimated margin — not "net profit"

Excel CSV Print

Stock & costs

Vase · Terracotta · Large	14 in stock
Unit cost (private)	₹520
Mug · Indigo	Cost missing — unknown, not zero

FEEL

"Serious brands run on this." Calm confidence — numbers you can show your CA.

MOTION

Order #1042 moves To dispatch → Shipped; #1039 flips to RTO and drops into the COD returns view. The "Booked vs cash" and "margin vs profit" lines fade in as a quiet promise.

BUILT ON

Order desk, COD/RTO & refunds · SKU inventory · Private COGS · Analytics & Excel exports · Role-based team access

Your domain. Your ads. Your audience — discovered.

Everything a growing brand reaches for is already wired in. No developer on call, no scripts pasted into every page.

YOUR OWN ADDRESS

shop.mittiandco.in

Connect your domain with guided, copy-ready steps. Secure connection and checkout security are set up for you during activation.

Website	Connected
Ownership	Verified
Secure connection	Active
Checkout security	Ready

META & GOOGLE, NATIVELY

Paste your Pixel and GA4 IDs. That's the setup.

Views, add-to-cart, checkout and confirmed purchases tracked across every page — with optional Conversions API and Google Ads conversions.

DISCOVERY BUILT IN

Get found in the LeBrands.Space digital mall.

Paid plans include placement in India's D2C brand search engine — traffic most store builders leave to you.

HONEST BY DESIGN

Consent first. Real purchases only.

Tracking waits for shopper consent. Failed payments never count as sales — so your ad decisions rest on true numbers.

DELIVERY YOUR WAY

Ship manually, or connect Shiprocket.

Tracking lives inside each order. Automated booking runs only when you confirm, once your Shiprocket account is approved.

FEEL

"The big-brand toolkit, without the big-brand team." Ambition, made practical.

MOTION

Bento tiles stagger in. Domain checks tick green one by one (Website → Ownership → Secure → Checkout). The mall tile glows last and links to the comparison page.

BUILT ON · COPY GUARDRAIL

Custom domains · Meta/GA4 measurement · Consent-aware tracking · Shiprocket (keep "once approved" — not universal) · Mall placement on paid plans only

FROM HELLO TO LIVE

Your flagship, open by evening.

Start after lunch. Launch before dinner. Payments, delivery and your own domain can follow whenever you're ready — Cash on Delivery works from the first order.

1. **Say hello to Ann**
   Business basics, in your language
2. **Choose your look**
   Try styles, adopt the one you love
3. **Add your products**
   Crop photos, set variants and stock
4. **Pick a plan**
   Right inside the chat — start free
5. **Publish**
   Go live — document review won't hold you back

Build the store your brand deserves.

Your free live period starts when you first publish — not when you sign up. Help is a tap away, even before launch.

Start free with Ann

Compare plans

FEEL

"I can do this today." Urgency through ease, never through pressure.

MOTION

The progress line draws left to right as the section scrolls into view; step 5 pulses once. A subtle sun-to-dusk tint shift across the band sells "after lunch → before dinner."

BUILT ON · COPY GUARDRAIL

Plans inside Ann · Free period from first publish · Non-blocking document review · Support from Ann & editor. Avoid promising every paid renewal flow is live.
